

How to Make Paper Snowflakes

by: Mimi, the Artist!™

1. Start with a square piece of paper

2. Fold the paper in half diagonally (to make a triangle), be neat and really crease the fold!

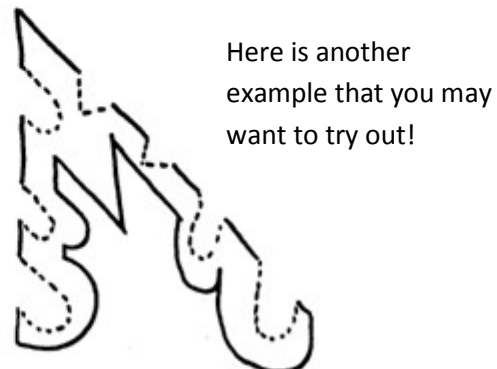

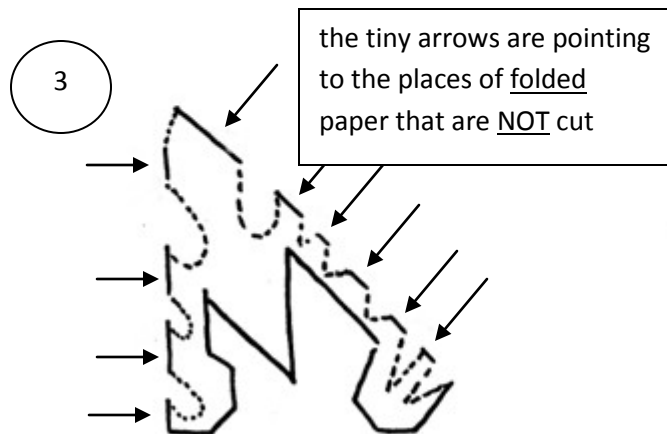

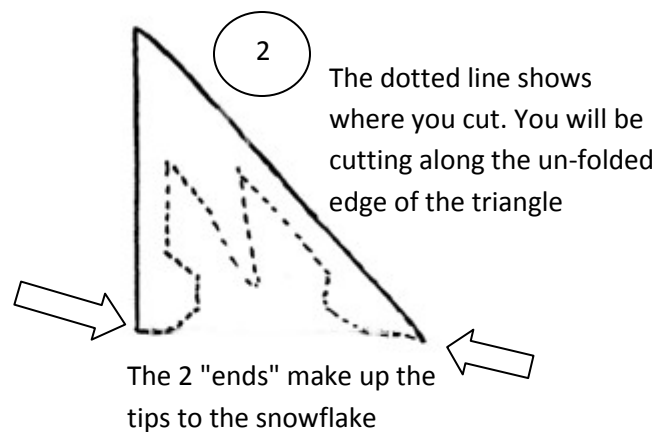

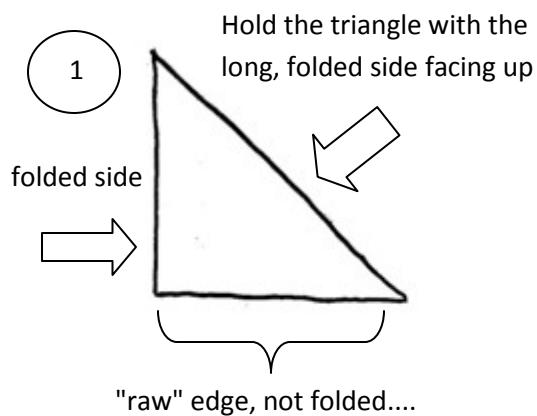

3. Fold the triangle in half to make a smaller triangle

4. Fold the smaller triangle into an even smaller triangle!

5. Time to cut! Follow the 3 steps below:

When you cut into the folded sides make sure that you leave enough of the folded edge UNCUT so the snowflake will hold together!
